

Exchange sets assembly instruction

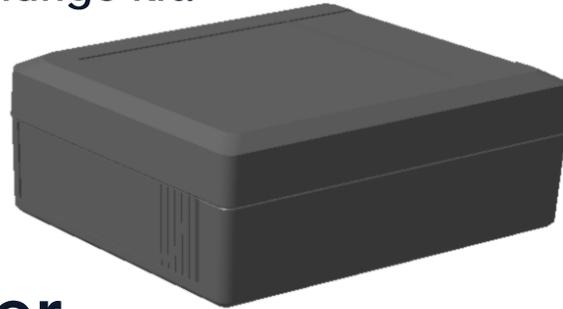

Version 01/2026 – for flinkey Box IXL only

Preparation

Box

⚠ Only boxes marked with 'IXL' or article no. (AN) '0150114xxxxxx' or '0150115xxxxxx' are ready for an exchange kit.

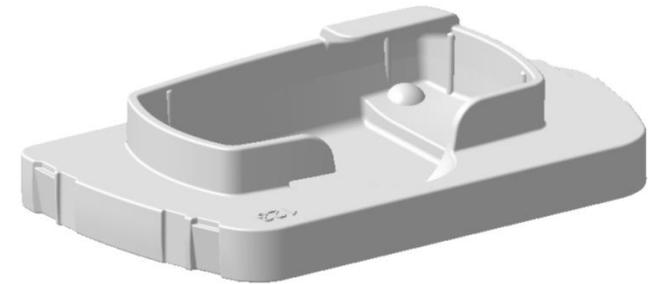

Screwdriver

⚠ A flathead / slotted, no too big screwdriver is required.

Key bed

⚠ One key bed is part of the exchange set.

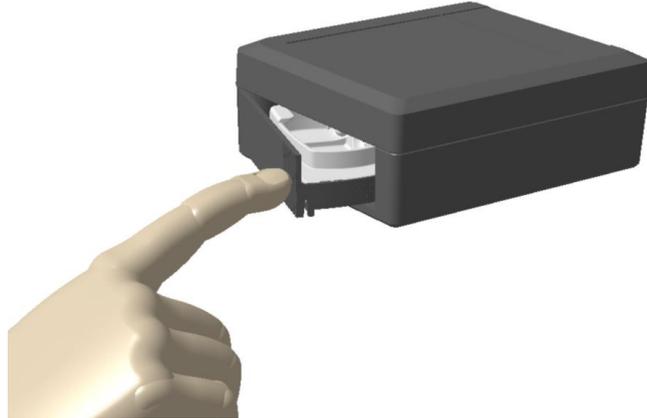

Levers

⚠ One left and one right lever are parts of the exchange set.

Open the drawer of the box to its full extent ³

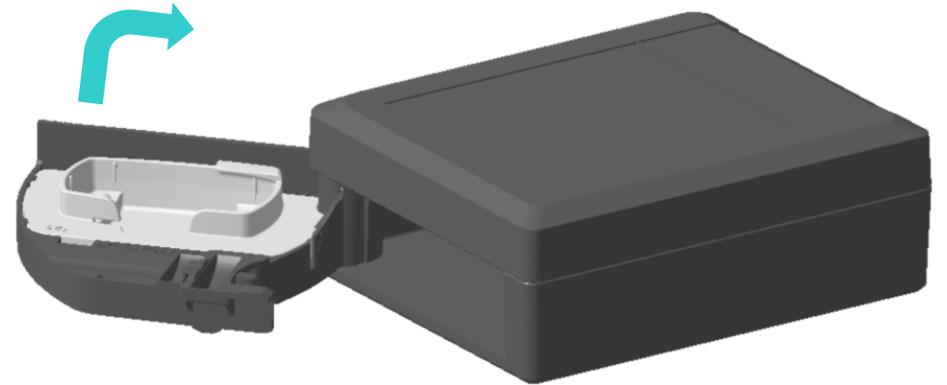

1 Push drawer open

2 Push gently from downside

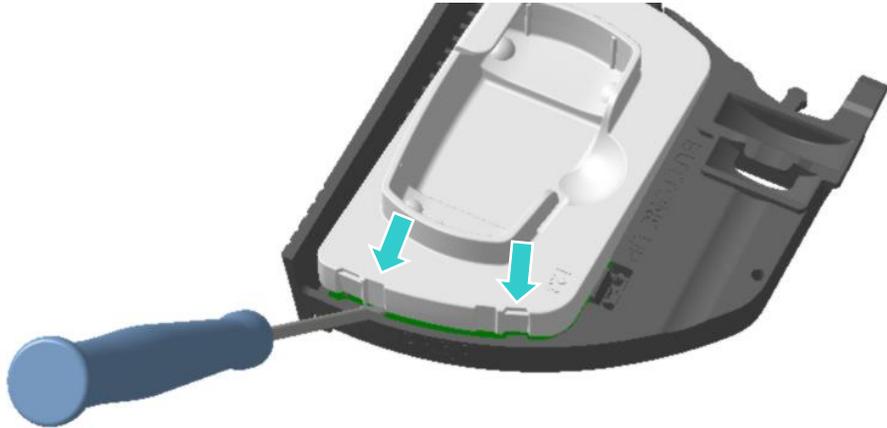

3 Move drawer further

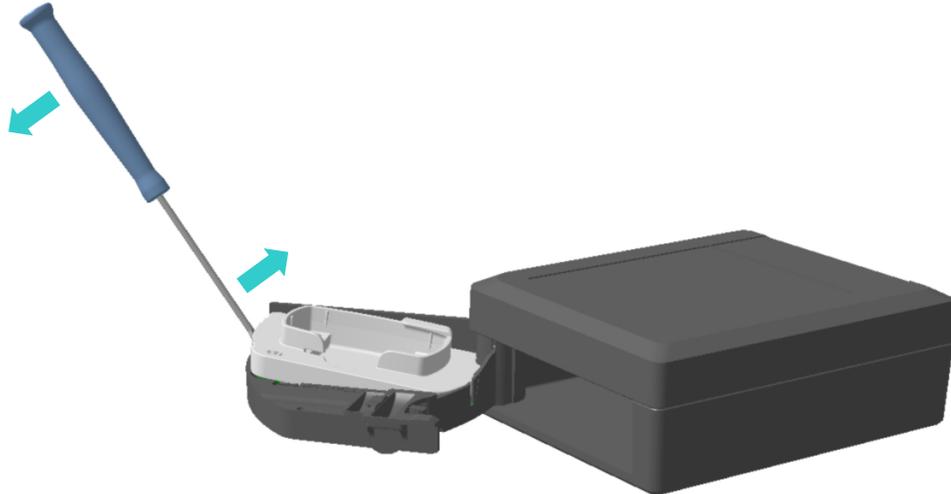

Take out key bed

4 Place screwdriver

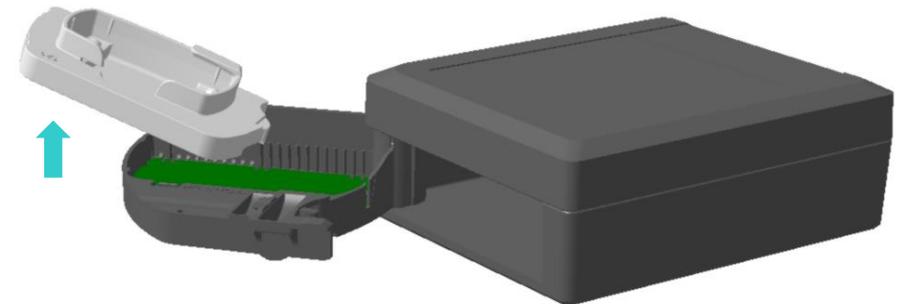

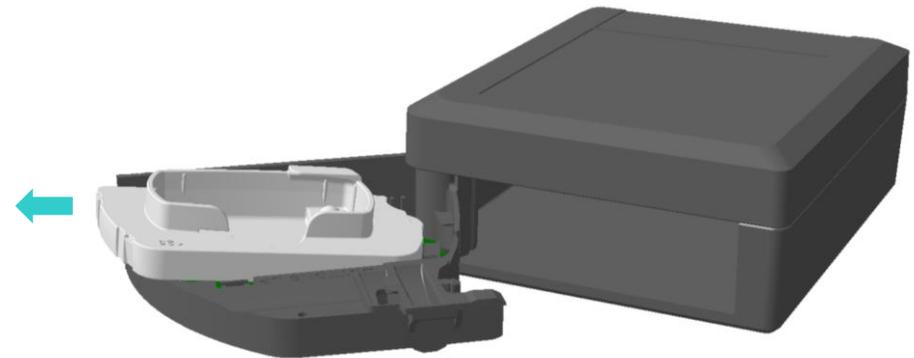

5 Gently lever out key bed

6 Carefully remove key bed

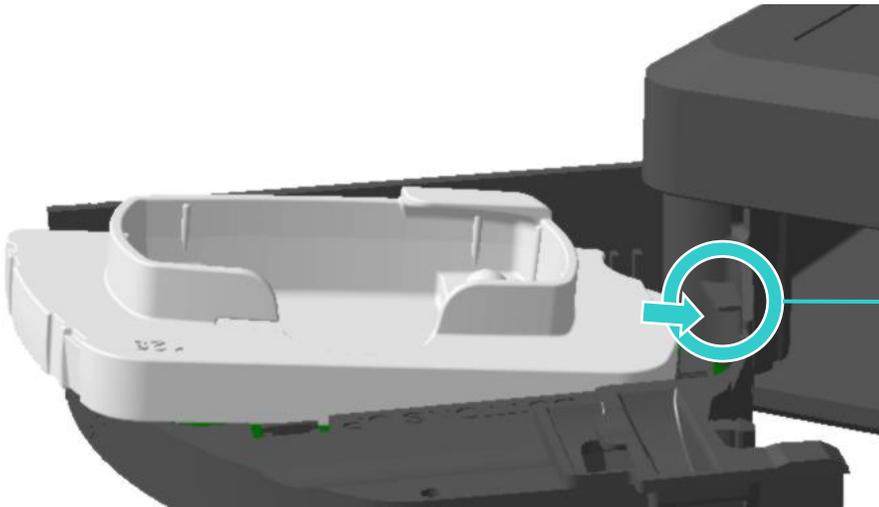

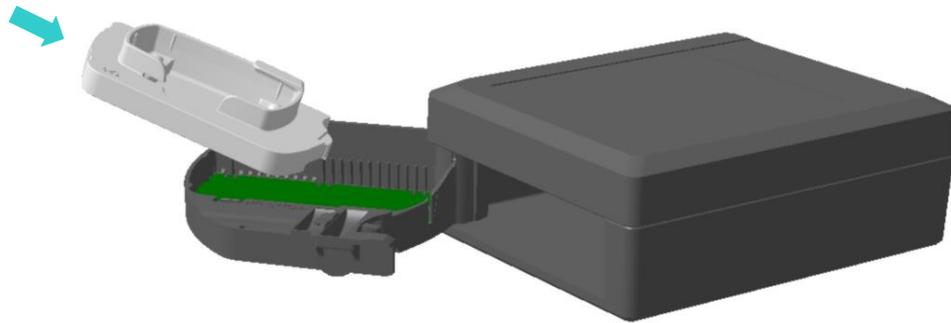

⚠ Make sure not to damage the electronics located underneath the key bed.

Insert new key bed

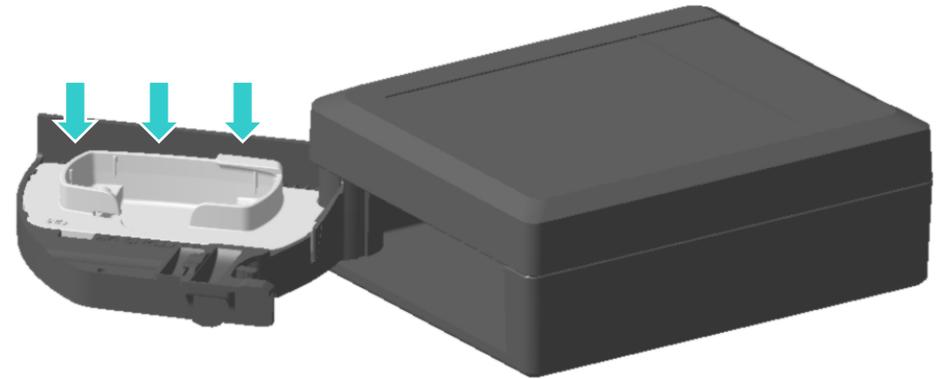

7 Place underneath flat clip

⚠ Pay attention to the direction indicated on the key bed, to the electronics and flat cable located near the drawer hinge.

8 Press from above

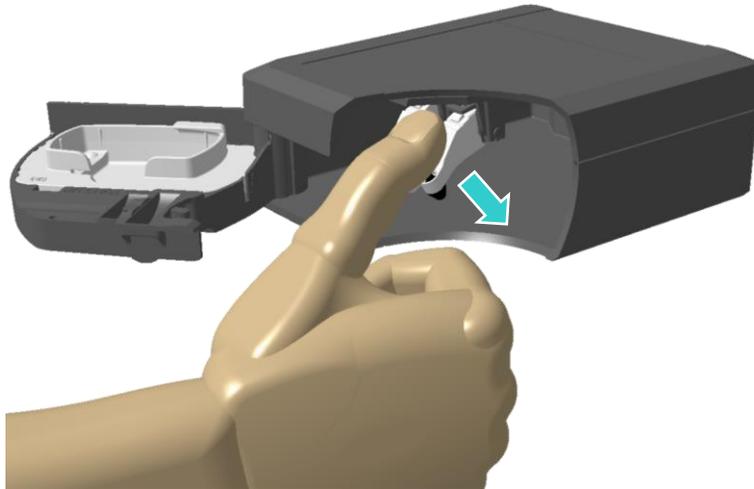

⚠ Make sure to click it firmly into the clips.

Take out levers

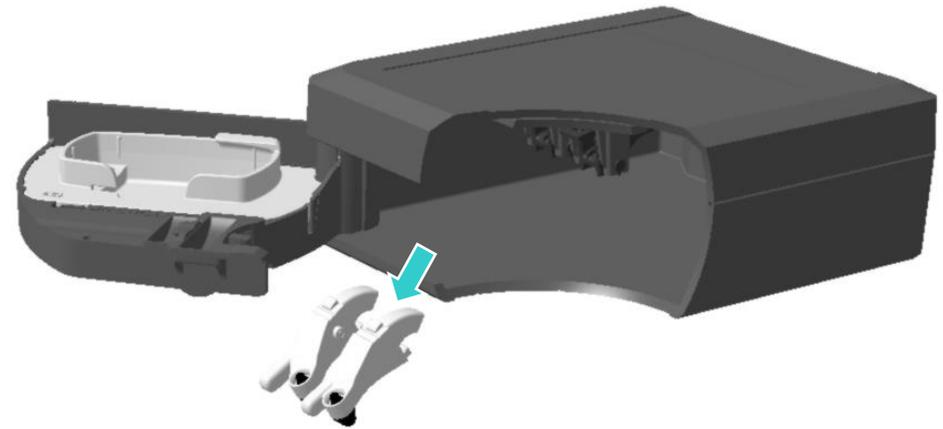

9 Press on levers from above

⚠ They are tightly assembled – you will need some force to release them.

10 Remove both levers

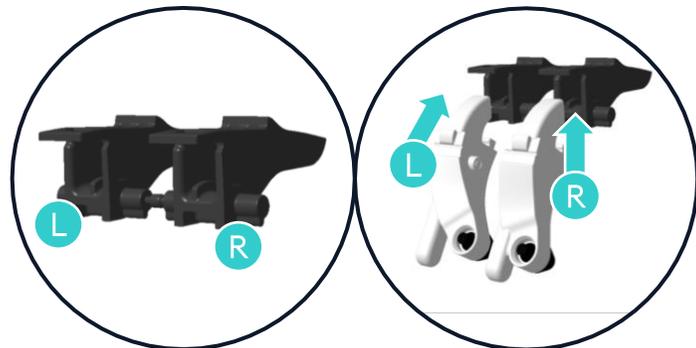

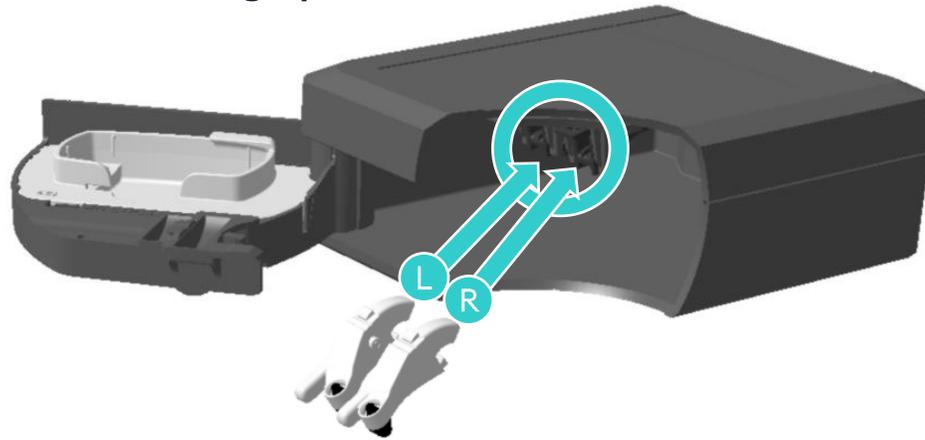

⚠ Be careful that the levers do not fall into the internal mechanism of the box.

Insert new levers

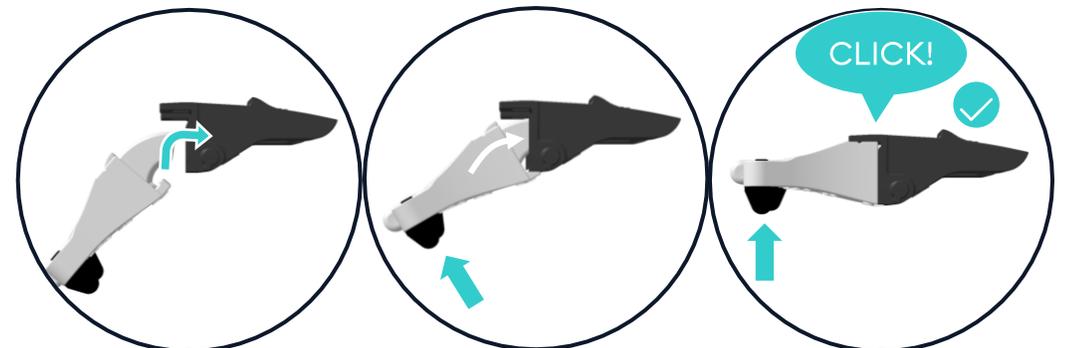

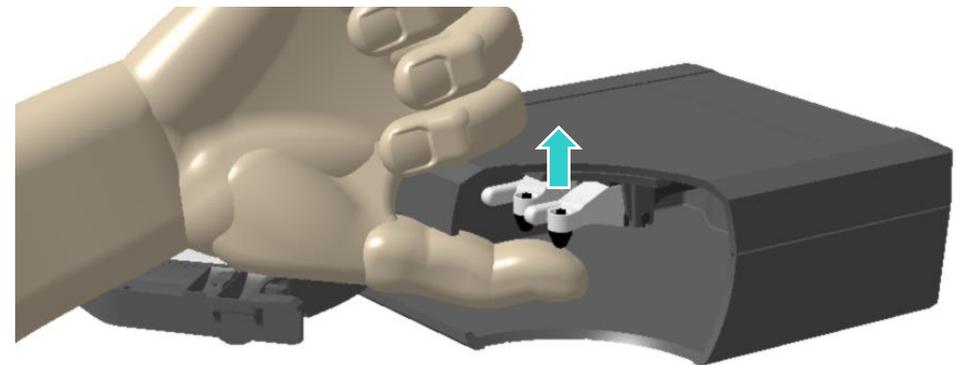

11 Insert new levers

⚠ Start with the lever marked with an 'L' and clip it into the left black counterpart – note, design-wise they cannot be assembled in the wrong spot.

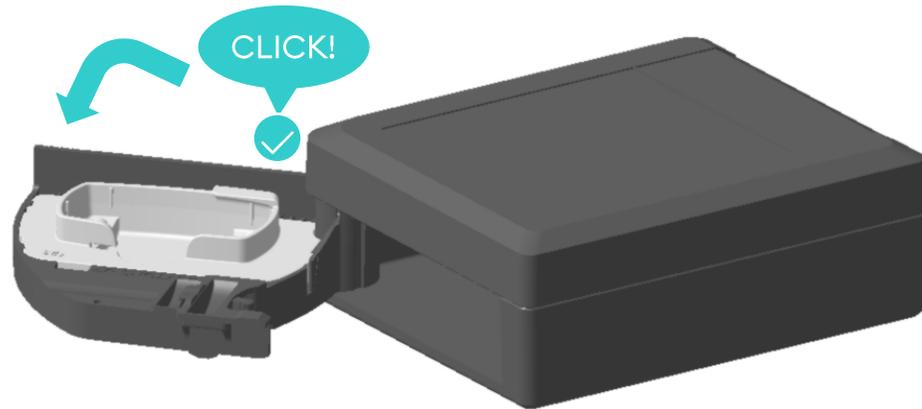

12 Clip in both levers

⚠ Some force may be required for pushing the levers upwards until you will feel and hear it snapping into the clip – make sure to have both levers clipped in properly all the way.

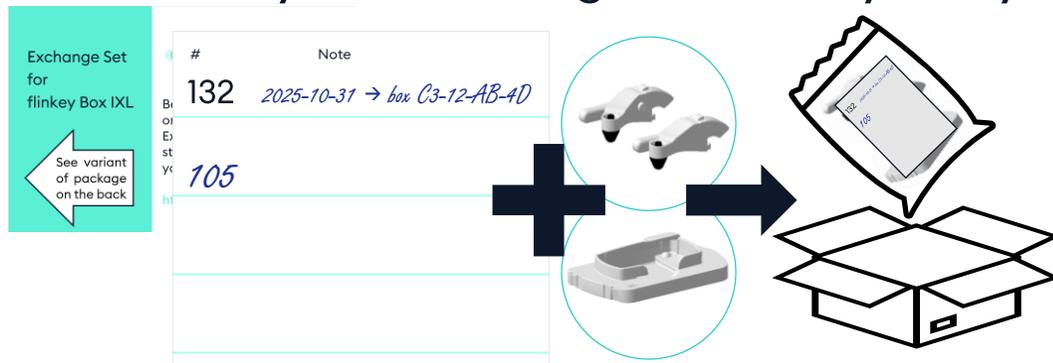

Finalization

13 Move drawer back

14 Pack up loose parts

⚠️ Though the variant is embossed on the old parts, you may use the card to label it more clearly before storing the set away safely.

15 Specify new car details

⚠️ Go to your fleet management system or <https://portal.flinkey.com> and specify the future car the flinkey box will be used with.
